Skills

JavaScript | TypeScript | React | React Router | React Context API | Material UI | React Hooks | JSX
State Management | Redux Thunk | Redux | Redux Toolkit | Vite | Ionic | API integration | HTML5 | HTML
CSS | SCSS | Tailwind CSS | Bootstrap | PWA | Responsive Design | Cross-Browser Compatibility | Node.js
Express.js | MongoDB | Mongoose | bcryptjs | JWT | Firebase | Redis | REST API | CRUD | Middleware
Error Handling | Authorization | Authentication | Git | GitHub | Version control | CI/CD

Internship

Web Development Intern, Internshala December 2022-March 2023

- **Completed an 12-week online training on Web Development.** training consisted of HTML, CSS, DBMS, React
- Developed and deployed responsive web applications using React.js and HTML5, increasing user engagement by 30% through enhanced interactive features and a mobile-first design approach.

Node JS, Internshala April 2024 – June 2024

- **Developed** a secure, **role-based** email marketing interface using React and Redux Toolkit, which empowered the marketing team to **send personalized** emails to a segmented audience, reducing manual efforts by 40%.

Certification

Full Stack Development With AI, AIMERZ.ai September 2024 – July 2025

- Successfully finished a rigorous Full Stack Web Development program. Gained practical experience in frontend and backend technologies, as well as AI/ML integration and data structures.
- Created an **AI-powered** fitness tracker using **OpenAI APIs** and **LangChain**. This tool allows personalized fitness goal tracking and workout suggestions based on user input and progress.

Education

Government Engineering College West Champaran, BTech in EE August 2021 – June 2025

- CGPA: 8.35/10

Projects

Pet Menagement github

- **Lead and build** a full-stack **Pet Management Web App**.
- Website lets users create profiles, **adopt pets**, or post pets for adoption. I used **React** for the frontend and **Express.js** with Node.js for the backend.
- Use **React hooks** for **non-blocking** state updates during backend calls, **enhancing** user experience by 5%.
- **Applied** pagination to fetch only the first 10 records per request, significantly reducing **payload** size and **improving API response** time — especially impactful for large datasets.

Book Store app github

- Worked on a full-stack **Book Store** web application using React, Express.js, and Node.js, allowing users to browse and purchase books, while optimizing **vendor** JavaScript to reduce app **bundle** size by 5% for improved performance.
- **Implement Lazy Loading** to reduce the load time of **application** by 25% .
- Implemented **indexing** and **Redis in-memory caching** to significantly improve backend response time, resulting in a notable reduction in **API latency** by up to 30% and enhanced **overall performance**.

Blogging Application github

- **Streamlined** blog content loading using route-level lazy loading and paginated API responses, resulting in 10% faster initial page loads and improved handling of large datasets
